

Yutraffic Engineering Services

Helping you operate sustainable and innovative ITS solutions

YUNEX TRAFFIC

Discover the Power of Yutraffic Engineering Services

At Yunex Traffic, our Yutraffic Engineering Services are here to seamlessly enhance and complement the capabilities of Yunex Traffic products and solutions. With a focus on collaboration and innovation, we address mobility challenges through innovative and cost-effective approaches, leveraging our worldwide expertise to deliver sustainable solutions tailored to each client's unique needs.

Services

Our services elevate Yunex Traffic solutions by providing professional expertise and technical finesse in areas like traffic optimization, intelligent transportation systems, and real-time operations. We work alongside your team and partners to ensure every Yunex Traffic solution achieves its fullest potential, addressing your unique needs.

Real World Results

Our work has driven success in cities like Coral Gables FL, Raleigh NC, and Ann Arbor MI, as well as with agencies such as THEA in Florida where we've implemented cutting-edge solutions that reduce emissions, improve safety and mobility, and create sustainable transportation networks. We look forward to providing tangible results through our services.

Collaborative Support at every step

Yutraffic Engineering Services work as an extension of your team, filling resource gaps and bringing technical expertise to your projects. Whether it's addressing staffing limitations, navigating new technologies, or enhancing operational efficiency, we ensure you gain measurable value from your Yunex Traffic solutions.

Build a Smarter Transportation Network

By partnering with Yunex Traffic, you not only gain access to deep industry expertise combined with innovative, cost effective, and sustainable solutions. From concept of operations and feasibility studies to system implementation and decision support tools, we are here to meet your mobility goals.

Yutraffic Engineering Services

End-to-End Support for Traffic Solutions

At Yunex Traffic, we bridge the gap between theory and practice, offering comprehensive support for all your traffic management needs.

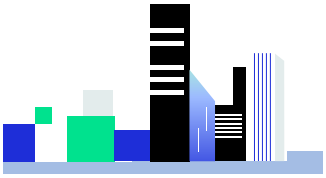

Enhancing Signal Performance

Utilizing our expertise and tools like Yutraffic Insights, we enable cost-effective and rapid signal retiming solutions, minimizing the need for expensive simulations or frequent field visits allowing for more focus on other priorities.

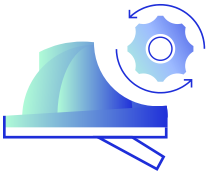

Preferred Partner for TMC Support

Our in-depth knowledge of traffic management solutions and tools makes us the preferred partner for Traffic Management Center (TMC) support — from real-time traffic operations to ongoing system maintenance and optimization.

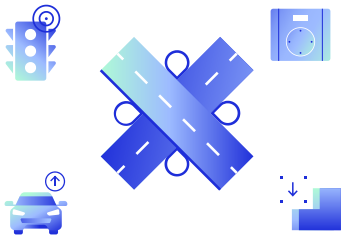

Real world traffic Management with Digital Twins

With tools like Aimsun, we engage in digital twin simulation projects and operate digital twins that effectively link to and improve real-world operations for and beyond traffic networks.

Practical Experience

Our practical experience positions Yunex Traffic as the top choice for developing studies such as Concept of Operations (ConOps), conducting ITS feasibility studies, and solution design support.

Intersection Efficiency Enhancement

Enhance your city's intersection efficiency with the support for operational integration and application of advanced solutions like CV2-X, ATSPM, and Adaptive.

Yunex LLC
9925 Bee Cave Rd.
Building B. Suite 201
Austin, TX 78733
www.us.yunextraffic.com

Yunex Traffic is a separately managed company of the Mundys Group. It is a global leader in the field of intelligent traffic systems, offering the widest end-to-end portfolio of solutions for adaptive traffic control and management, highway and tunnel automation, as well as smart solutions for V2X and road user charging / tolling. Yunex Traffic has 3300 employees from 58 nations and is active in over 40 countries worldwide. Its intelligent mobility solutions are currently being used in major cities across the world, including Dubai, London, Berlin, and Bogota. Yunex Traffic has successfully concentrated its efforts on mastering technologies in the three segments of hardware, software, and service, and is subsequently the only supplier who is capable of meeting all major regional standards (European Union, UK, Asia-Pacific and US).
